RUM

Rum has been made for many hundreds of years, but only recently has it started to gain true recognition for the high-quality drink it is. All rum is made from sugar cane juice and this is either boiled to become molasses and then fermented and distilled, or as in the 'Agricole' rum, the cane juice is directly fermented and then distilled.

Rum is the natural partner for good quality cigars; many of the flavours associated with rum are also associated with cigars: caramel, coffee, and vanilla.
